Linking to Databases

This tutorial will demonstrate the following:

- Part 1: Creating Express Links to databases listed in the GALILEO menu
- Part 2: Creating Custom Database menus
- Part 3: Branding GALILEO links

Part I: Creating Express Links to Databases Listed in GALILEO Menu

- **Express Links** can be used to link directly to any database in **GALILEO** menu.
- **GALILEO** menu includes locally purchased resources & free resources as well as **GALILEO** resources.
- **Express Links** are automatically created when database is added to **GALILEO** menu.
- **Express Links** might not persist in word processing applications.

- Access the [GALILEO](http://galileo.usg.edu/) home page.
- Click on the yellow **Databases A-Z** tab near the top center of the screen.

The screenshot shows the GALILEO Scholar website interface. At the top, there is a blue header with the GALILEO Scholar logo and navigation links: Home, About GALILEO, Contact Us, and Help. Below the header, a yellow navigation bar contains tabs for 'Browse by Subject', 'Browse by Type', 'Databases A-Z' (which is highlighted), 'Journals A-Z', and 'Search'. The main content area is titled 'Find Databases' and includes a search box with a 'Find Database' button. A 'Tips!' box provides instructions on how to locate specific databases. The page also features a sidebar with 'Express Links' and a footer with the text 'Georgia's Virtual Library...bringing quality content to you!'.
